

Main screen: RecipesView

Note:

- 1) The colors are different because on the tablet I drew on, I had a limited palette of colors.
- 2) In the search bar you can see that I can also search for a recipe by doctor, not just by patient.
- 3) You can see that I also moved the button to add a new prescription up and that I also added a button to filter the recipes by status. It is preselected on "all statuses".

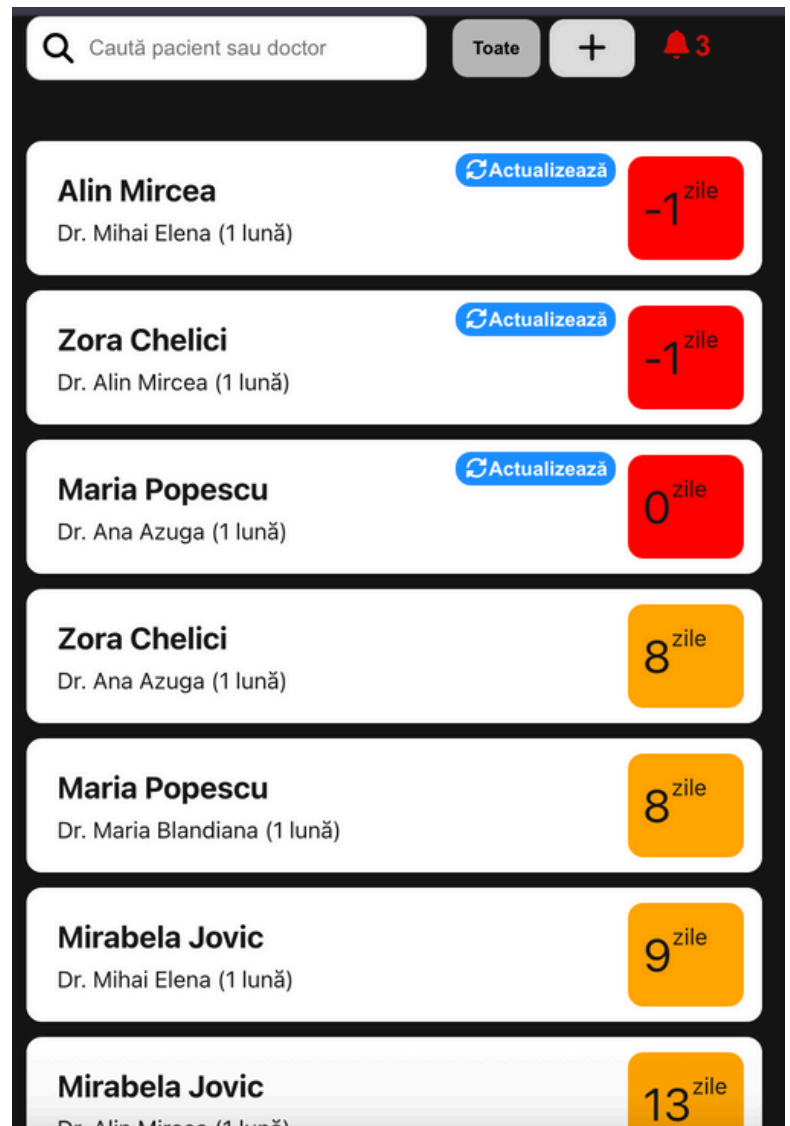

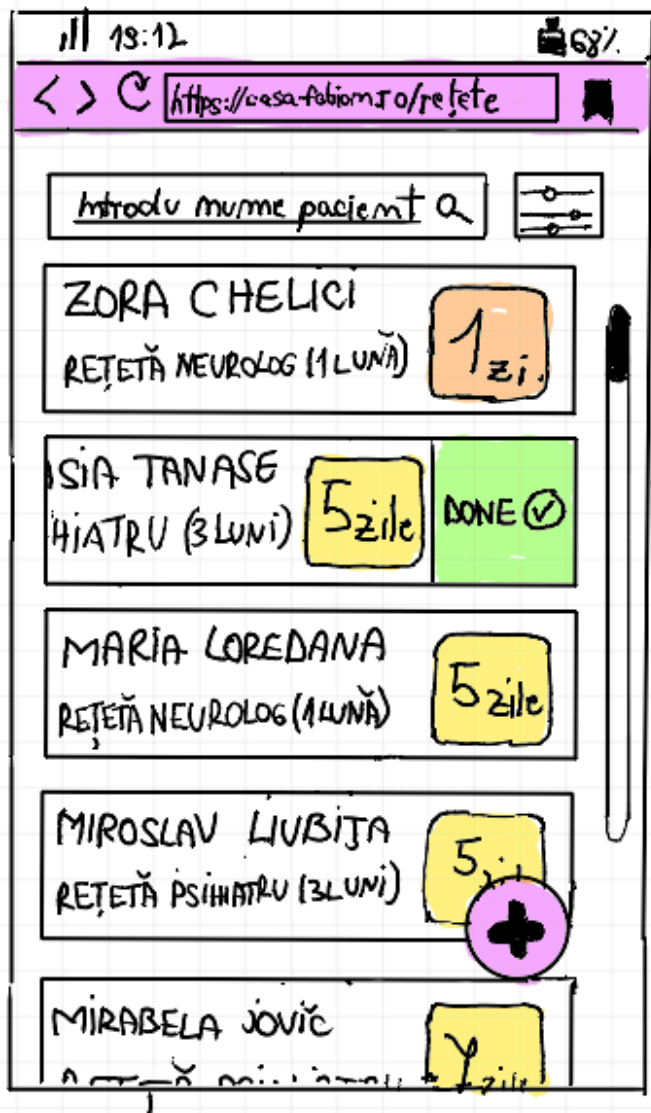

Alert regarding recipes with red status in the main screen (appears when you click on the bell)

Note:

1) Previously we wanted the alert to appear once the patient accesses the app, then we decided that we wanted to mask it with that bell and have it remain on the screen as long as there are recipes with red status.

Extending the recipe

Note:

0) Updating a recipe means changing the next prescription date by the number of months.

For example: 07.07.2025 is the day the admin went to renew the prescription. Then the next prescription date will be:

$07.07.2025 + 30 \text{ days} = 05.08.2025$

1) Previously, we wanted to extend the recipe by SWIPING to the left, but then we thought better of it and decided to make it simpler.

Recipes that have 0 days or less will have an "actualizează" tag and to extend it, you need to click on the card and then on the update button.

Screen: AddRecipeView

A hand-drawn sketch of a mobile application screen titled "AddRecipeView". The screen features a status bar at the top with the time "13:12" and a battery icon. Below the status bar is a navigation bar with a back arrow, a home icon, and a URL "https://casa-fabian.ro/rețete/rețetă-nouă". The main content area contains five form fields, each with a label and a dropdown menu:

- Selectează pacient:
- Selectează tip rețetă:
- Selectează doctorul:
- Alege data prescrierii rețetei:
- Selectează durata rețetei:

At the bottom of the screen are two buttons labeled "ANULARE" and "SALVARE".

A digital rendering of the "AddRecipeView" screen. The screen has a red header bar with the title "Adaugă rețetă nouă" and a close button "X". The main content area contains five form fields, each with a label and a dropdown menu:

- Selectează pacient:
- Selectează doctor:
- Alege data prescrierii rețetei:
- Selectează durata rețetei:

At the bottom of the screen are two buttons labeled "Anulare" and "Salvare".

Note:

1) Nothing has changed here. I just added an header that contains an "X" button so there are more ways to cancel the process. I did the same for the rest of the views. (EditRecipeView and for Delete and Alert modals)

1. 2025-07-30

 Înapoi

Note:

- 1) This screen is accessed by clicking on a card.
- 2) We decided to make it simpler here and not have that button that shows the other buttons.
- 3) The “Actualizare” button is only displayed for recipes that have 0 days or less left.
